OO GARDEN CLUB

Adding Color

You can change the color of these sixteen foot acrylic panels to fit whatever an occasion calls for. The DMX control allows you to customize light show effects. We have a feeling the coliseum will use red a lot.

A modern lounge area featuring four blue armchairs arranged around a central round coffee table. The room has a red carpet and a large, cylindrical brass chandelier hanging from the ceiling. In the background, there are wooden cabinets and a glass-walled office space. The ceiling is a mix of wood and white panels with recessed lighting.

The Suite Life

The suites are filled with beautiful polished brass fixtures that give an authentic Trojan feel. Extensive polishing and attention to detail was used to ensure the quality matches the standards of VIP guests.

Gold Everywhere

Signature polished each aluminum section of the large rings, then used a semi-transparent gold powder coat to give the fixture a rich, durable gold color.

Keeping it Shiny

With many trials, Signature perfected the gold mirror finish of these fixtures. To keep the brass from discoloring, Signature used a unique clear coat over the blades.
